# DAY - 1

WORKSHOP SCHEDULE

Friday, 19th April, 2024

## Dear delegates ,

Commencing a doctoral journey is a significant undertaking, one that requires dedication, passion, and a clear sense of direction. At the heart of this journey lies the PhD proposal - a document that not only outlines your research objectives but also serves as a blue print for your entire doctoral experience. Whether you're just starting to consider the idea of pursuing a PhD or you're already knee-deep in the application process, this workshop will give you some useful tips. We aim to guide you through the process of constructing a quality PhD proposal. We'll explore the key components such as identifying gaps in the literature, defining research questions to articulating methodology so as to structure the research proposal. We also intend to give you an overview on the research designs and statistical tools required to strengthen your proposal .

We co-ordially invite you for this workshop.

With regards,

**Dr. Jyothi Thomas**
